

Get Rich or Die Tryin'; how to build (gold) equipments sets.

We all know Mafia City likes to take our money, but here we have made a detailed guide on how to build sets for free. Keep that money and spend it on hookers, alcohol and drugs, like normal people do.

Chapter 1: Terrorizer's Set Level 25

For city 1447 the level 25 Terrorizers set is a good starting point.
All the materials can be collected in the city itself.

Material needed for this particular set:

1. *Topaz*
 - Mercenary; Shredder
2. *Gems*
 - Lapidary Complex
 - Gem boxes
3. *Blueprint*
 - Street forces (fragments*)
 - Clan kick-back (fragments*)

* 100 fragments can be synthesized in one blueprint.

To get this equipment in gold in one go you need the quantity of the above mentioned items at a full hundred percent, which takes a long time to collect. For example you need 65 blueprints. Which is $65 \times 100 = 6500$ blueprint (firearm) fragments.

Therefore you will have the option to ignore quantities asked and start with the quality level grey.

To set this up you press on each item and select the quantity needed to ensure a grey equipment outcome. Which is easy, because it's the bare minimum. Adding anything above the minimum is a waste of resources and should be avoided.

Below a step by step example for the blueprints on how to select the minimal needed quantity.

1) Press the item, in this case firearm blueprints.

2) Press (firearm) blueprint as show below.

3) Swipe (like Tinder/Grindr) until minimal needed quantity, for blueprints this is 1.

When the necessary materials are selected press exchange so we can make the first set equipment piece. It will take roughly nineteen minutes to complete.

Needless to say we don't want grey equipment, we are winners and want gold. Therefore we need a way to change this sad grey one in a better color. Synthesizing is the answer and solution to this problem.

Chapter 2: Synthesize

Go to your safe at the pawnbroker to select the Terrorizer equipment piece. You will find it under the tab equipment, press to open the equipment details. The following menu will open.

There are two options to collect the remaining three equipment pieces needed to do a synthesize.

1) Make all four of the same set equipment pieces, but by doing so you waste two valuable resources. In this example Topaz stones and firearm blueprints.

2) making three normal equipment pieces level 25. Important to make them grey to again not waste valuable gems.

For later keep in mind to make them in the correct color. You could either use the gems in the correct color, or do the same synthesizing trick as we are teaching you now doing for the set equipment.

The game will automatically select the equipment which could be used for synthesize from your safe. Double check if the game doesn't accidentally picks a better color.

When pressing synthesize you instantly complete the set equipment in a new/better color. Which in this example is green.

Rinse and repeat until desired color is achieved.
